

I am concerned about the possibility that K-Love FM will be taken off the air in my area. It is a very uplifting station that gets me through tough days. Many people in my community feel the same way. If K-Love were to be replaced by an LPFM station we would have no other source for a station such as K-Love. It is listener-supported which has to say something about the effect that it has on listeners, not only in my area, but around the country. Please preserve this station! Thank you.
